

# The Dynamic Presenter App

Product Presentation

## What's Wrong? | Current Presentation Situations

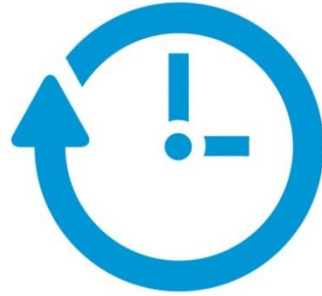

- Assets found in various formats in various locations
- Various Assets require various Players
- Presenter tied to Mouse or Clicker
- Presenter tied to single Monitor/Screen
  - Not free to roam
- Complicated Presentation Data Transfers
- Presenter unable to spring freely amongst Assets
- Presentations not Tech Savvy, not Gesture Interactive and not Easy to Create with Successful Results

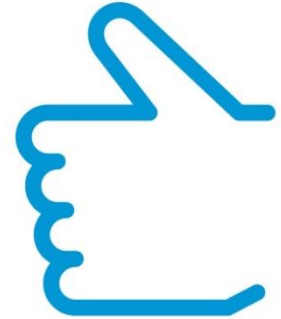

# The Dynamic Presenter App (DPA) | Call to Action

Look Smarter

Prepare Faster

Create Success

# The Dynamic Presenter App-Features

The Dynamic Presenter App provides

- **All In One Solution**  
Unify Videos, PowerPoint slides, PDF's and Images

- **Remote Monitor/Screen Control**  
Quicker location of additional assets during show

- **Free Asset Navigation**  
Unleash the power of gesture language

## All in One Solution | Multiple Asset Types

- My Assets in one Place
- Ready to Use
- PowerPoint
- PDF
- Images
- Videos

Import and Show all relevant file types without ever switching the application.

Have all your media assets sorted and available at your fingertips.

Pull out any of your media files and ad lib, seamlessly, while presenting.

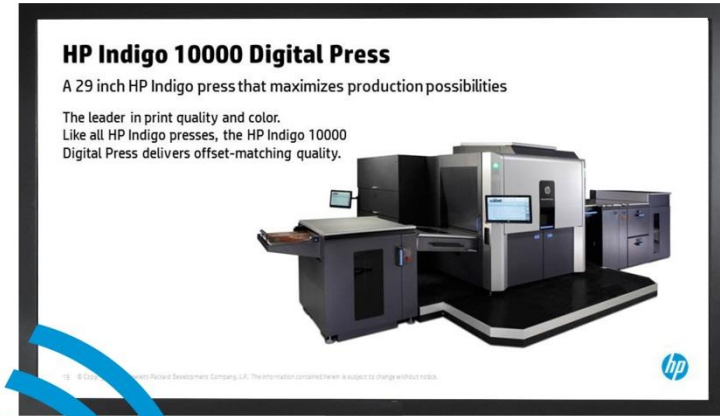

## Remote Monitor/Screen Control | Connectivity

- Fast and Easy Set Up
- Wireless
- Free Selection of Monitors
- Full HD Videos
- Automatic Sync of presentations

The HP Dynamic Presenter App can wirelessly remote control monitor screens.

These screens mirror every move you make on your tablet. They play HD video with maximum quality.

## Remote Monitor/Screen Control | Hibernation

- Screensaver Videos/Images

The remote controlled monitors play pre-configured 'screensaver' content while not connected.

# Remote Monitor/Screen Control | File Sync to Monitors

- Monitor Multi-Use
- Last Minute Updates
- No Need for Memory Sticks

Your presentation is automatically synchronized with the remote monitor computer of your choice.

## Remote Monitor/Screen Control | Gesture Language

- Intuitive
- Engaging
- Spontaneous

The DPA uses three basic, intuitive gestures: tap, swipe, grab.  
This allows for a more lively, spontaneous and expressive show.  
Additional gestures available.

# Free Asset Navigation | Gestures

## Basic Gestures

1

**Tap**  
directly to next slide

2

**Swipe left**  
to next slide

**Swipe right**  
to previous slide

3

**Three finger grab**  
fly out fly in to next slide

---

## Additional

**Two finger grab**  
to zoom out to the Overview

**One finger pan**

**Long touch**  
to go to the Context-Menu

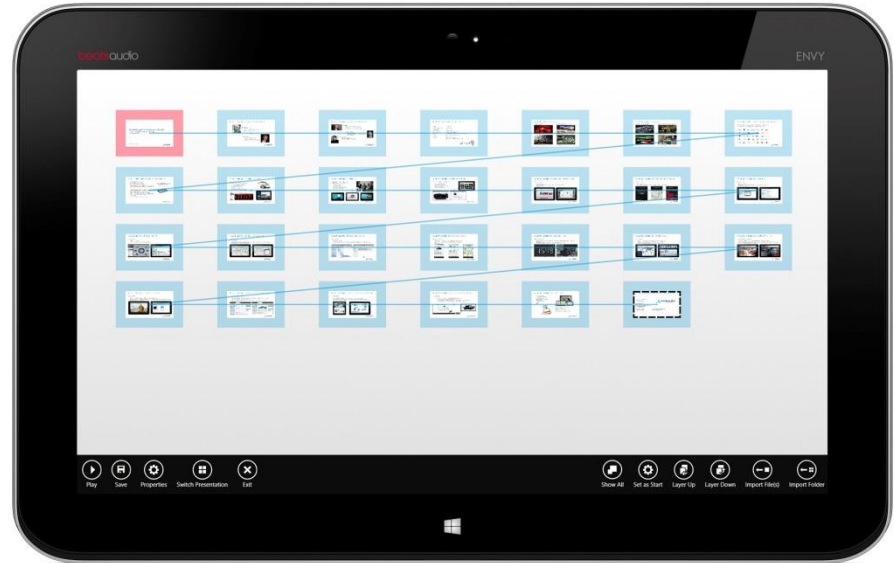

## Free Asset Navigation | Auto Path

- Auto Import
- Classic Sequence Style
- Clicker Proof

The fastest way to use the DPA is to import a folder of media files and run it.

The DPA automatically orders the files into a presentation for you.

You can also control the DPA with a clicker.

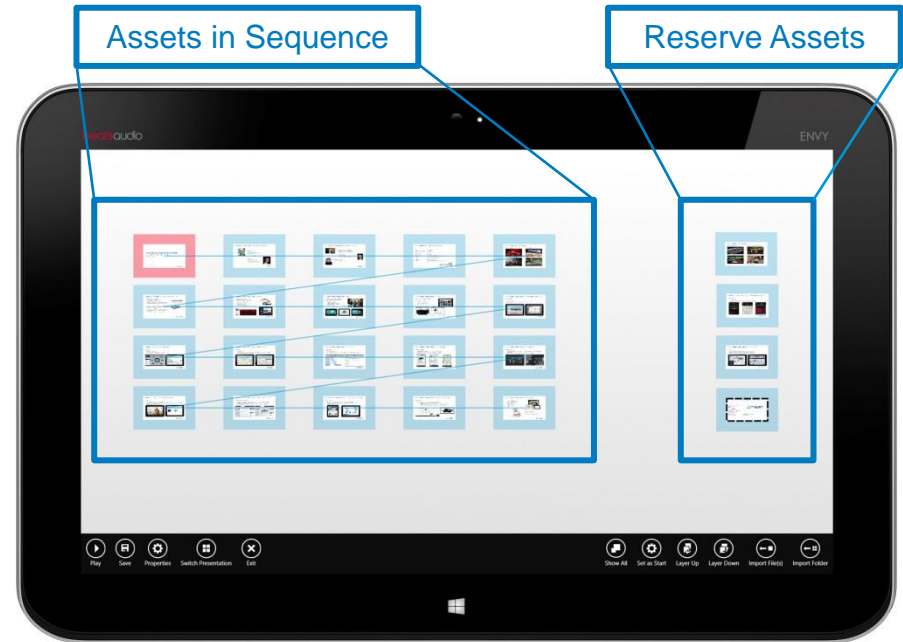

## Free Asset Navigation | Reserve Assets

- Free Mode: present Assets held in reserve
- Adapt to Audience
- React to Questions

You can make media files stand 'outside the path'.

You can show them any time by zooming out, then tapping on any of them.

# The Dynamic Presenter App | Benefits

- **Presentation Quality**
  - Stronger Impressions
  - Inform Concisely
  - State of the Art
  - Tech Savvy
- **Time Advantage**
  - Faster Editing of Complex Shows
  - Quicker location of additional Assets during Show
- **Competitive Edge**
  - Simple, Cost Effective Show Production
  - More Entertaining than your Competitor
  - Better Reaction Capabilities to Your Audience
